Welcome to IOPscience, the home of scientific content from IOP Publishing and our partners.

Find out more about IOPscience, IOP Publishing and IOPcorporate.

Find content in these subject areas:

- Condensed matter, soft matter and materials science
- Atomic, molecular, optical and plasma physics
- Nuclear and high energy particle physics
- Medical physics, biological physics and biomedical engineering
- Astrophysics, cosmology and gravitation
- Mathematical, statistical and quantum physics
- Earth and environmental science

Librarians

Libraries are at the centre of the scientific community – from small colleges to the largest universities; start-up firms to international corporations. The library is one of the fundamental reference points for all of the information on which researchers, teachers, technologists, doctors and engineers base their decision-making. As trained information professionals, librarians are the principal contact when it comes to ensuring that relevant research is available when and where it is needed in both academia and industry.

IOP Publishing is proud to have a close working relationship with thousands of librarians around the world. The feedback and advice of librarians about everything from coverage to pricing and delivery methods is critical in shaping the way we provide our publications to the scientific community.

We appreciate the many conflicting demands on librarians' time and provide services designed to ease some of that burden. We have a **dedicated website focused on the specific needs of librarians**. Here, users can request usage statistics, add their logo to brand their IOPscience pages, check on

You can see, your institute/consortium name, Identity ID, address.
