

# PROJECT MUSE

(<http://Muse.jhu.edu/journals/>)

Project MUSE is a unique collaboration between libraries and publishers providing 100% full-text, affordable and user-friendly online access to over 350 high quality humanities and social sciences journals from over 60 scholarly publishers. MUSE began in 1993 as a pioneering joint project of the Johns Hopkins University Press and the Milton S. Eisenhower Library at JHU. Grants from the Mellon Foundation and the National Endowment for the Humanities allowed MUSE to go live with JHU Press journals in 1995. Journals from other publishers were first incorporated in 2000, with additional university press and scholarly society publishers joining in each subsequent year. UGC-Infonet Digital Library Consortium can have access to 389 full text journals of Project Muse.

**Accessible to:** 101 Univ. (Phase I & II)

**Coverage:** varies from title to title

The screenshot above gives the alphabetical list of journals with their period of access. By clicking on an alphabet users can browse the list of journals starting with that letter. To browse a specific journal click on the journal name as shown above. It gives the journal homepage as shown below.

In the Journals Homepage select the volume no. and issue no. from the drop down menu to browse a specific issue no. of that journal. Here users can click on the HTML or PDF options to view the article in full-text.

## Search

Project Muse includes two types of search, i.e., **Basic search and Advance search**

### Basic Search

In Basic Search give the search term in the search box and chose the field to be searched from the drop down menu to search for a term.

**Simple search page for journals**

**Click on search**

**Select type of information you required**

**Put your search term**

**Select number of items per page from drop down menu**

Email/Export Saved Results Search History Help

Search For: Human value in All Fields (w/text)

Sort by: Relevance

Display: 10 items per page

Search Clear

Access to full-text journals provided by INFLIBNET Centre. New search plugin available. Click here to learn more.

Author Reviewed  
Title Reviewed

http://muse.uq.edu.au/about/librarians/search\_plugin.html

Use the **Sort by:** pull-downs to sort results by Relevance, Date or Journal Title. Use the **Display:** pull-down to choose how many results to be displayed per page. User can also change the order and number of results from the Results page.

The screenshot shows the Project MUSE search results page. A red circle highlights the 'Results' tab in the navigation bar. Another red circle highlights the 'Email/Export Saved Results' link. A third red circle highlights the 'Modify Search' link. A fourth red circle highlights the 'Result Page' navigation (1 2 3 4 5 6 7 Next >). A fifth red circle highlights the 'Save Marked Results' button. Three callout boxes provide instructions: 'Return to search page for modify your search' points to 'Modify Search'; 'By clicking the option you can e-mail the the saved results' points to 'Email/Export Saved Results'; and 'Click one by one to go to next pages' points to the 'Result Page' navigation.

## Results Display Statement with Re-sorting Options

The close-up shows the text 'Displaying: 1 to 10 of 84 results' followed by a dropdown menu set to 'Relevance', a page size dropdown set to '10', and a 'Re-Sort' button.

This row tells you how many results you've retrieved on your search and how many results display per page.

Use the options given to change the way your results display. You can re-sort your results by Relevance; Date, Latest First or Earliest First; or Journal, A-Z or Z-A. You can also change the number of results displayed (10, 25, 50, 75, or 100) on a page.

## Change Your Search

To change the search there are two options, i.e. **Modify Search** and **Search within Results** are available. In modify search it goes back to the search screen and in search within results it makes a narrower search.

The close-up shows the 'Search Within Results' section with a 'Modify Search' link, an 'OR' separator, a search input field, a dropdown menu set to 'All Fields (w/text)', and a 'Refine' button.

## Marking and Saving Results

Use the check boxes next to each citation, or click in the Mark All/Clear All box to mark or clear all results on a page.

**Mark All / Clear All**     

**1. Cohen, Edward H.**  
[Victorian Bibliography for 1999](#) [\[View in PDF\]](#)  
*Victorian Studies* - Volume 43, Number 4, Summer 2000

Click on the **Save Marked Results** button to save your marked results to the **Saved Results** page, where you can manage them in several ways, including e-mailing, exporting or downloading and printing.

### E-mail/Export/Print Saved Results

Users can click on **E-mail/Export Saved Results** from the top toolbar on the Results page to view your Saved Results list. From the Saved Results page users can:

- Export Results to Citation Software.
- Download Results in Printer-Friendly Text File.
- See Marking and Saving Results for more information about saving citations to the

### Saved Results page

- Use the check boxes on the Saved Results page to mark results that you want to e-mail, export, download, or print.
- E-mail saved results

Access provided by INFLIBNET Centre

**Standard Setting in Human Rights: Critique and Prognosis**

[Makau Mutua](#)

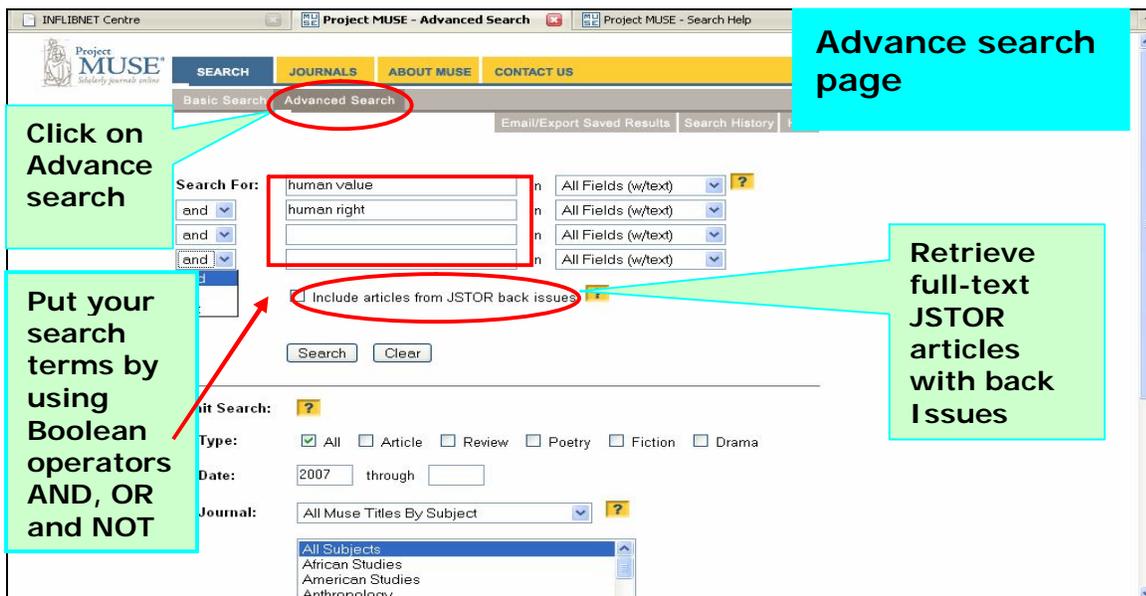

**Abstract**  
 This article interrogates the processes and politics of standard setting in human rights. It traces the history of the human rights project and critically explores how the norms of the human rights movement have been created. This article looks at how those norms are made, who makes them, and why. It focuses attention on the deficits of the international order, and how that order—which is defined by multiple asymmetries—determines the norms and the purposes they serve. It identifies areas for further norm development and concludes that norm-creating processes must be inclusive and participatory to garner legitimacy across various divides.

Your results will appear once you click search. They will be presented in relevance order, with the article containing the most references to your search terms first. To access the full text of articles listed in Project Muse, click on the **View in PDF** link after the article title.

## Advanced Search Screen

Advanced screen provides more options for performing both simple and complex searching.

- Enter term(s) in the search box(es). Use quotations (e.g. "paradise lost") to search for phrases.
- If desired, combine terms by typing Boolean operators AND, OR, and NOT, or type terms in separate boxes and use the pull-downs at the left of the search boxes.
- Select fields to search from the right-hand pull downs. You can combine search strings against different fields by using the different search boxes
- Select how you want to sort and display your results. If needed, use limits to narrow the search results to specific sets of journals or articles.

## Limiting a Search

If needed, use limits on the advanced screen to search on subsets of the Muse database by document type, date, or journal title(s):

**By Type:** Use the pull-down to limit to articles, reviews, or types of literary works.

**By Date:** Enter a 4-digit year in each box to set a range of dates to search.

**By Journal:** Limit search by individual journal title(s) or by subject group(s).

## Upcoming journals:

Users can view the list of **Upcoming Journals** by selecting this option from left side menu of the homepage.

The screenshot shows the Project MUSE website's 'Upcoming Journals' page. The page title is 'Upcoming Journals'. Below the title, there is a paragraph explaining that journals accepted for inclusion are listed throughout the year. Two links are provided: 'View Upcoming Journals by Subject for 2007' and 'View Upcoming Journals by Subject for 2008'. A red circle highlights these links, with a callout box pointing to them that says 'Click to view upcoming journals by subject'. Below the links, a section titled 'Upcoming Journals for 2007:' lists various journals. A red bracket groups this list, with a callout box that says 'List of Upcoming journals for 2007, 2008 (current years)'. Another callout box on the left says 'Click any one of the journal then go to the articles'. The page also features a navigation menu with 'SEARCH', 'JOURNALS', 'ABOUT MUSE', and 'CONTACT US'.

## Sample Issues and Journal Descriptions

This tab can be used to view the description about a journal. Users can select the name of the journal from the dropdown menu to view its description and a free preview of an issue of that journal.

The screenshot shows the Project MUSE website's 'Sample - African Studies Review' page. The page title is 'African Studies Review'. Below the title, there is a dropdown menu with '- Journals -' selected. To the left, there is a thumbnail image of the journal cover. The main content area contains a detailed description of the journal, including its multi-disciplinary nature, frequency, and editors. A red circle highlights the text 'Free Sample Issue: Volume 48, Number 1, April 2005', with a callout box pointing to it that says 'Click here to browse this issue'. The page also features a navigation menu with 'SEARCH', 'JOURNALS', 'ABOUT MUSE', and 'CONTACT US'.

Users can also subscribe to RSS Feeds and e-mail alerts about a journal selecting it from the list on left side of home page.
